

PRITAM MANDAL

Bhubaneswar, Odisha | mandalpritam765@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

Professional Summary

Full Stack Developer with strong expertise in Java, Python, Spring Boot, React.js, and SQL, with a proven track record of designing, developing, and deploying production-grade applications end-to-end. Experienced in data pipeline concepts, algorithms, data structures, and software architecture patterns (MVC, REST). Proficient with databases (PostgreSQL, MySQL, Redis/Valkey) and cloud platforms (AWS); hands-on exposure to Apache Airflow-style workflow orchestration and prototyping real-world product features. Proficient in leveraging AI tools — GitHub Copilot, Amazon Q, and Claude Code — to work smarter and ship faster. Published IEEE researcher; strong analytical and problem-solving skills backed by internship experience and multiple live deployed projects.

Education

KIIT – Kalinga Institute of Industrial Technology

B.Tech in Computer Science & Engineering | CGPA: 9.19/10

Pathfinder Higher Secondary Public School

Senior Secondary (XII) – Science | Percentage: 86.20%

Relevant Coursework: Data Structures & Algorithms, OOP, Software Engineering, DBMS, Computer Networks

Bhubaneswar, Odisha

08/2023 – Present

Durgapur, West Bengal

2020 – 2022

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, Scala (basic)

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, GSAP

Backend & Data: Spring Boot, Spring MVC, REST APIs, Hibernate, JDBC, Apache Airflow (basic), Node.js

Databases: PostgreSQL, MySQL, MongoDB, Redis / Valkey

Architecture & Practices: OOP, MVC, SOLID Principles, Agile, JWT Auth, System Design

AI & Productivity Tools: GitHub Copilot, Amazon Q, Claude Code, Prompt Engineering, LLM APIs

DevOps & Tools: Docker, AWS (EC2, S3, RDS), Azure, Git, GitHub, Linux

Work Experience

Java Developer Intern | Certificate

04/2025 – 05/2025

Navodita Infotech

Remote

- Designed and developed backend modules for an Employee Management System handling attendance, performance evaluation, and data management for 100+ employee records; wrote Python scripts for data processing and report generation
- Applied OOP principles and MVC architecture for modular, maintainable design; used JDBC and SQL queries for database operations and identified areas of improvement in existing application flows
- Leveraged GitHub Copilot to accelerate feature delivery, improve code quality, and proactively identify performance bottlenecks; worked with AWS EC2 for deployment

Research & Publications

ResMamba: Chest X-Ray Classification (Normal / Pneumonia / TB) | IEEE Xplore | Certificate

KIIT, 2025

- Designed a novel hybrid CNN-Mamba architecture from scratch (PyTorch, no pretrained weights); outperformed ResNet-101, DenseNet-201, EfficientNet, and ConvNeXt V2 baselines on 3-class medical imaging dataset
- Built complete training pipelines with AMP, stratified CSV-based dataset splits, and reproducible experiments on Kaggle (Tesla T4 GPU); **published in IEEE**

Projects

CodeCoder – Competitive Programming Platform | GitHub | Live

Nov 2025 – Jan 2026

- Built and deployed a full-stack LeetCode-style platform using **Java + Spring Boot + React.js** with **Valkey-sandboxed code execution** supporting 5 languages and **200 simultaneous submissions** with zero timeout collisions
- Designed PostgreSQL schema with hidden/visible TC split; Redis/Valkey cache invalidation for sub-50ms reads; built **contest leaderboard** with real-time rank aggregation
- Built custom **PostgreSQL-backed transactional mail service** for contest notifications — no third-party SMTP; RBAC, JWT auth, and admin APIs for bulk problem management; stress-tested using Amazon Q

The Interviewer – AI Mock Interview Platform | GitHub | Live

Jan – Feb 2026

- Designed, developed, tested, and deployed a full-stack AI interview platform using **Spring Boot + React.js** with LLM-based agentic pipelines; end-to-end ownership from architecture to production
- Implemented JWT auth, credit-based access control, Razorpay payment gateway, and transactional email workflows; leveraged GitHub Copilot and Claude Code throughout development

Certifications

Google Android Development | Frontend Domination | Juniper Networks – Cloud Computing | PW Skills – C++ with DSA
